Streaming Service Process Flow

Host iPad Gstreamer Implementation

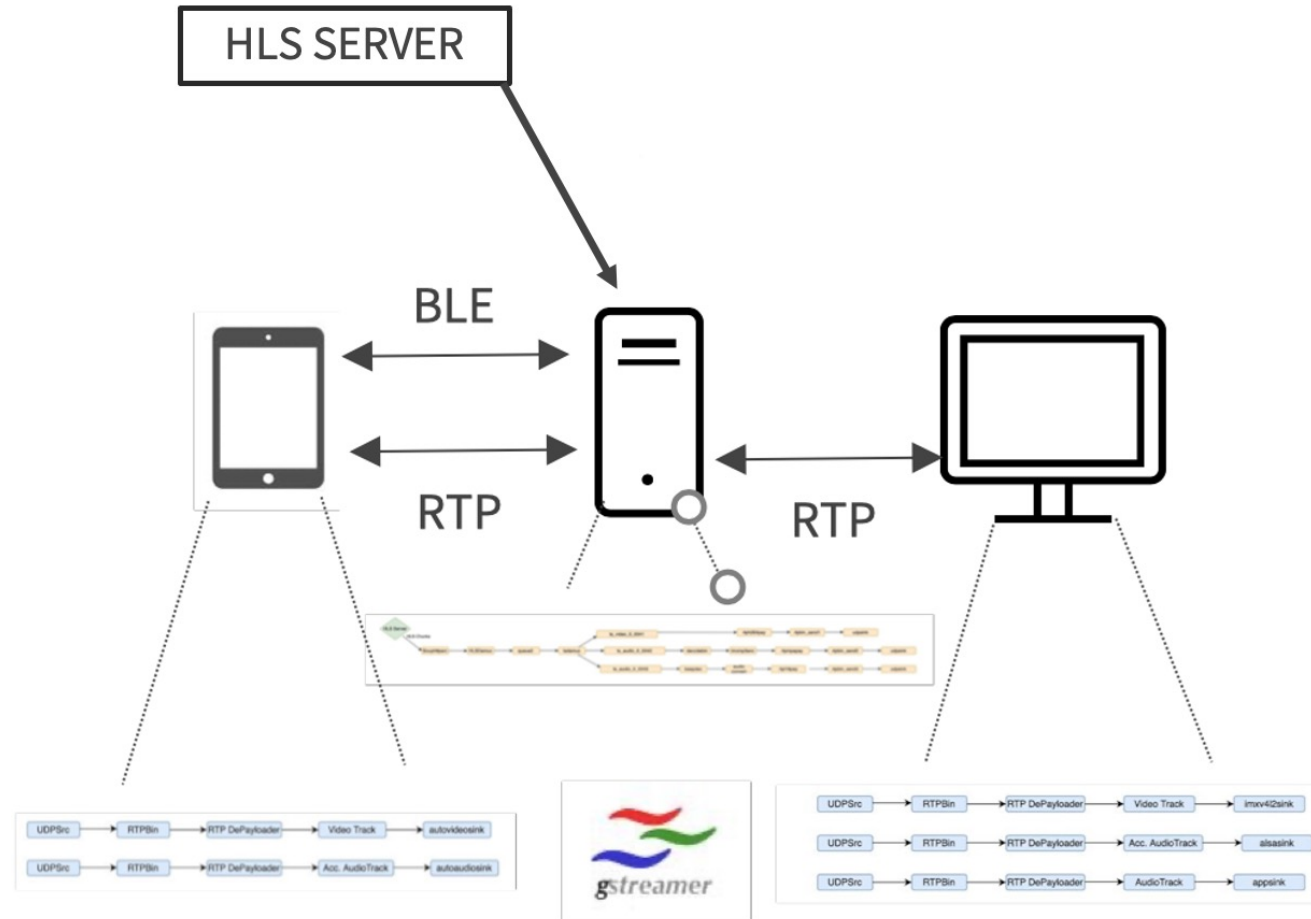

Streaming Server Pipeline (simplified)

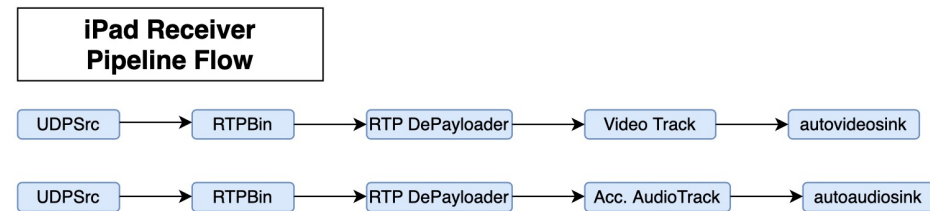

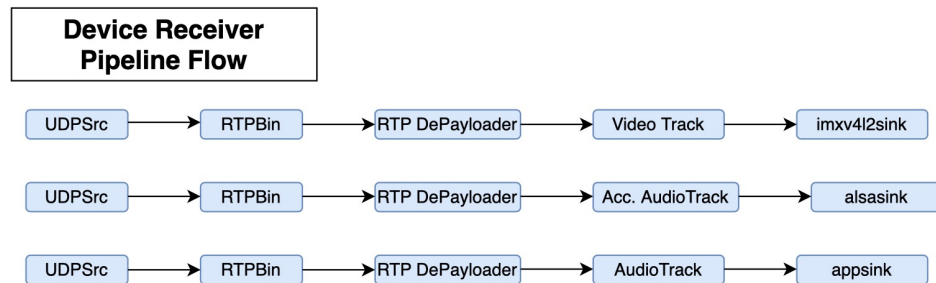

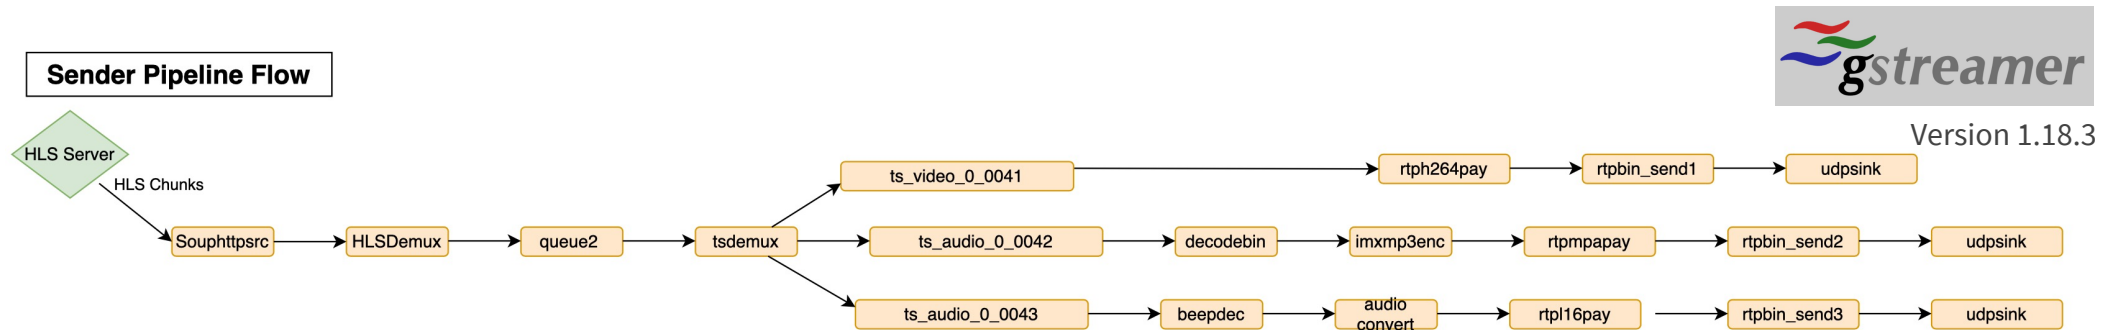

Sync Time budget = 33ms
Nodes / Clocks
Timestamp and NTP
Errors and redundancy
Success!

Listener Experience

Listener Device RTP Implementation

HLS & RTP Technologies

Feature Enhancement Wish List

On Demand Seek with RTP Capability

Adaptive streaming on the server

Lessons Learned

Synchronization of streams is very challenging in multi-sourced setup

Plan for network unpredictability

More to understand about QOS

Optimization is continuous
